PROFILE

Frontend developer with experience in React, JavaScript, HTML and CSS. Passionate about creating dynamic and optimized interfaces with good accessibility and performance practices. Certified by Meta in frontend development, with experience in REST APIs, Git and testing. I am looking for an opportunity in a team where I can continue to grow and provide efficient solutions.

PROJECTS

Arkanoid Game project

2024-2025

- Worked with technologies like HTML5, CSS and JavaScript.
- used concepts like canvas tag for game creating, manipulating this with vanilla JavaScript, practicing concepts like ES6, and data structures

Little lemon landing page project

2024-2025

- Completely built using react, practicing concepts like, JSX syntax, hooks like useState, useEffect and controlled forms

Portfolio web project

- Created a responsive portfolio website using Astro, React, and Tailwind.
- Implemented an attractive design with good UX/UI practices.
- Deployed the site on Netlify and used Git/GitHub for version control.
